WORK EXPERIENCE

Software Development Intern- Automation, Product & Quant Analytics — August - December 2026
Amplify Enterprises — *Richland, MI*

- Automated workflows via an LLM client chatbot and budget estimator, saving ~**8** hrs/week, cutting quote time by **64**%.
- Lead development of a pet wellness app launching Dec 2026 and an internal FPA hiring CRM serving **650+** candidates.
- Build predictive stock models with a quant dev, powering daily reports and dashboards that save ~**10** hrs/week.

CS Summer Intern- Software & Data — June - August 2026
Vertafore, Inc. — *East Lansing, MI*

- Co-developed AI-powered CRM system, implementing **7+** core features and debugging legacy code with stakeholder input.
- Conducted **18** employee interviews; produced technical documentation and onboarding resources for AI fluency initiatives.
- Analyzed **21,000+** Salesforce cases using SQL & Excel to identify product trends; evaluated our new AI agent adoption.

Tech Lead — April 2026 **-** Present
CAS Technology Services, Western Michigan University — *Kalamazoo, MI*

- Lead **5+** monthly team-based projects to improve lab systems, automate workflows, and drive operational efficiency.
- Manage **25+** technicians & attendants across multiple labs; managing schedules, coverage, hiring and onboarding.
- Assist the Director of IT with budget records, web development, supply inventory, work orders and office operations.

Evaluation Assistant I — March 2026 - Present
Evaluation Lab, Western Michigan University — *Kalamazoo, MI*

- Execute **3+** weekly field surveys with **70+** community members to collect data for nonprofit program evaluations.
- Analyze data from **20+** organizations, deliver insights via reports, infographics, and presentations for stakeholders.
- Design **5+** monthly data collection tools and logic models to measure program impact across diverse communities.

PROJECTS

Specter | *React, FastAPI, Google OAuth 2.0* | *Cybersecurity* | *Full Stack* | GitHub | Live Demo — May - June 2026

- Built a full-stack privacy tool with Gmail OAuth scanning, bulk sender deletion, and opt-out flows for 20+ data brokers; secured with AES-256 encryption, JWT auth, and minimum-scope permissions. Evolved from inbox-cleaner.

xPredict | *Python, Scikit-learn, XGBoost, Streamlit* | *Data Science* | GitHub | Live Demo — June 2026

- Developed a FIFA World Cup 2026 outcome predictor using Elo ratings, 49,000+ matches, and Monte Carlo simulations at 60.5% accuracy, deployed via Streamlit. Extending with player-level event models in v2.

MyDB | *Go* | *Database Systems* | GitHub — April 2026

- Built a relational database engine in Go from scratch, implementing SQL parsing, a heap-based storage engine, B-tree indexing, and a REPL interface, architecturally similar to SQLite and MySQL.
